

IMPORTANT!

Infographic on Password Security

Number 1

Password Requirements

- Use a mix of uppercase and lowercase letters, numbers, and special characters in your passwords.
- Avoid common words or phrases that are easy to guess.
- Update your passwords regularly to maintain security.
- Never share your passwords with anyone, including coworkers or family members.

Number 2

Use a Password Manager

- Use a password manager to securely store and manage your passwords.
- Store passwords in a secure location, such as an encrypted file or password-protected document.
- Enable multi-factor authentication for an extra layer of security.

Number 3

Create a Random Password

A random password generator can be used to increase difficulty in brute-force attacks and then stored in a password manager

Number 4

Don't Use Personal Information

Don't use personal information that can be easily obtainable such as DOB, ID Names and ID number.
